

PARAMOBIL™

Static standing frame

PARAMOBIL™ is a multifunctional standing frame that combines three modes: static, dynamic, and rehabilitation. In static mode, it aids early rehabilitation by improving physiological processes and oxygenating the body. Dynamic mode supports movement skill development, while rehabilitation mode complements therapy. With adjustable knee supports, PARAMOBIL™ is ideal for use in rehabilitation centers, even for users in a coma. Its versatility, rich features, and wide adjustments meet the needs of various users. The device is available in a complete unit or customized to suit specific needs.

Easy operation

24⁺

24-month warranty

Stable construction
